

Fall 2018 *Lester Wolfe Workshop in **Laser Biomedicine***

“Seeing Forest and the Trees: Light-Sheet and Related High Throughput Microscopy Techniques”

“LEAD Microscopy”

Adela Ben-Yakar, Ph.D.

Professor of Mechanical Engineering, The University of Texas at Austin

“Holistic Molecular Imaging and Rapid Phenotyping of Complex Biological Systems”

Kwanghun Chung, Ph.D.

Professor of Chemical Engineering, Massachusetts Institute of Technology

“Turn It Up to 11: Strategies for Speeding Up Microscopic Imaging”

Christopher Rowlands, Ph.D.

Lecturer in Bioengineering, Imperial College London

“High Resolution Imaging of Multicellular Organisms”

Srigokul Upadhyayula, Ph.D.

Instructor in Pediatrics, Harvard Medical School

Tuesday, November 13, 2018, 3:30-6:00PM

Massachusetts Institute of Technology
The Moore Room - Building 6, Room 321
Cambridge, MA 02139

Refreshments served at 3:00PM

Sponsored by the MIT Laser Biomedical Research Center, MIT, MGH Wellman Center for Photomedicine, and the Harvard-MIT Division of Health Sciences and Technology
